RAKT | Quick start

M-VAVE FM-1 FIRMWARE

Your first jam

1 Start the band

PLAY

Turn up MASTER. Press PLAY. Press again to stop.

2 Pick a genre

PRESETS

Turn PRESETS on the Studio overview. Try Dream Pop or Lo-Fi.

3 Play a chord

WHITE KEYS

On Chords, play a white key for the root. Tap a black key for a chord color.

Find your way

SELECT → Studio → Sound → Record → Help

Turn SELECT to switch tabs on the overview. In a unit, it turns pages when available.

ALGORITHM Highlight a rack unit.

SEL Open or apply.

HOME Back out to the rack.

K1-K4 Follow the screen labels.

Change the groove

EDIT in Studio

New take at the next bar. Open a part first to regenerate just that part.

K2 Activity sets how busy the selected part plays.

Swap the sounds

EDIT on Sound overview

Swap all four sounds. Open Mix for K1-K4 levels.

FX → K1 → SEL

Browse and apply an FX preset.

Add an arp

ARP K1 to Band

Arpeggiate the running part. Turn ALGORITHM to switch Chords and Layer. Choose Keys to arp what you play.

GLO Play the mixer

Press GLO again to return.

Tap the first four black keys to mute. Hold the first four white keys to solo.

A4 queues a one-bar fill. B4 drops or brings back the drums at the next bar.

Turn SELECT for tempo while GLO is open.

REC starts or ends a manual take. USB audio captures the full mix.
